Course Objectives & Course Outcomes

Year 2021 - 22			
Sr.NO	Name of Certificate/ Value added Add on course offered	Couirse Objectives	Course Outcome
1	Personal Financial Management-Introduction to Mutual Funds	Introduce students to the concept of mutual funds, their structure, and how they function in the financial markets, principles of investment, risk, and return in the context of mutual funds.	Gain a solid understanding of mutual funds, their structure, and how they operate. Acquire knowledge of key investment principles, including risk and return.
		Explore various types of mutual funds, including equity funds, debt funds, hybrid funds, and index funds, along with their characteristics and investment objectives.	Understand risk factors and implement strategies to manage risk effectively. Make informed decisions regarding the tax implications of mutual fund investments.
		Emphasize the importance of diversifying investments within a mutual fund portfolio. Explore various investment strategies, such as systematic investment plans (SIPs) and systematic withdrawal plans (SWPs).	Develop a long-term perspective on wealth building and financial security through mutual fund investments.
2	Entrepreneurship Development	Provide an overview of entrepreneurship, its importance in the economy, and the entrepreneurial mindset.	Develop an entrepreneurial mindset characterized by creativity, adaptability, and a willingness to take calculated risks.
		Familiarize students with the legal and regulatory aspects of starting and running a business, including business structures, licenses, and permits.	Identify and manage business risks to minimize negative impacts on the venture. Conduct business ethically and with social responsibility.
		Teach effective presentation and pitching skills for attracting investors, partners, and customers. Explore various sources of funding and capital, including bootstrapping, loans, and venture capital.	Gain confidence in one's ability to start and manage a successful business. Be prepared to launch and manage a startup or entrepreneurial venture.

3	Personality Development and Communication Skills	Foster self-awareness to help individuals understand their strengths, weaknesses, values, and aspirations.Improve the ability to build and maintain positive relationships with others.	Gain increased self-confidence and self-assuredness in various situations. Build and maintain positive relationships with colleagues, peers, and superiors.
		Enhance active listening skills to understand others better and respond appropriately. Teach effective techniques for preparing and delivering presentations confidently.	Build and maintain a professional network, which can lead to various opportunities. Develop leadership skills and qualities for career advancement.
		Develop emotional intelligence to recognize and manage one's emotions and empathize with others. Enhance time management skills to improve productivity and meet deadlines.	Improve employability and career prospects through enhanced communication and interpersonal skills. Experience personal growth and self-improvement in various aspects of life.
4	Communication Skills	Help students convey their ideas and messages clearly and concisely. Teach active listening skills to understand others better and respond appropriately.	Communicate ideas, information, and messages clearly and accurately. Be an attentive and empathetic listener, improving understanding and rapport.
		Explore the significance of body language, gestures, and facial expressions in communication. Improve writing skills for emails, reports, and other professional documents.	Resolve conflicts and disagreements constructively, preserving relationships. Deliver engaging and informative presentations to various audiences.
		Teach the norms and etiquette of communication in professional settings. Address effective communication in the context of email, social media, and virtual meetings.	Improve employability and career prospects by demonstrating strong communication skills. Experience personal growth and self-improvement in various aspects of life.
5	Basic Concept of Object Oriented Programming using C++	Provide students with an understanding of programming concepts and the role of programming languages. Teach students how to define classes and create objects in C++.	Develop a solid foundation in programming concepts and the C++ language. Create and use classes and objects in C++ programs.
		Introduce polymorphism and demonstrate function overloading and method overriding. Teach students how to define constructors and destructors in C++ classes.	Overload operators for custom class implementations. Manage dynamic memory allocation and deallocation efficiently.
		Discuss dynamic memory allocation and deallocation using pointers and the new and delete operators. Introduce file handling concepts in C++ for reading and writing data to files.	Gain proficiency in programming with C++ and solving programming tasks using OOP principles. Prepare students for more advanced topics in OOP and C++ programming.

6	Quantitative Aptitude	Build a strong foundation in mathematical concepts and principles. Prepare students for competitive exams, aptitude tests, and assessments that include quantitative sections.	Gain proficiency in fundamental mathematical concepts, including arithmetic, algebra, geometry, and statistics. Develop the ability to solve quantitative problems efficiently and accurately.
		Teach various mathematical techniques and shortcuts for quick and accurate calculations. Improve time management strategies for completing quantitative sections	Manage time efficiently during exams and assessments with time-limited sections. Improve calculation speed and accuracy, especially when time constraints apply.
		Encourage critical thinking to evaluate problem-solving approaches and choose the most suitable ones. Develop the ability to reason quantitatively and make informed decisions based on numerical data.	Build confidence in solving quantitative problems independently.Equip students with quantitative skills that are valuable in various academic and professional fields.
7	Modern Robotics	Provide students with a deep understanding of the principles and concepts of modern robotics. Explore the dynamics of robots, including modeling and control of robot motion.	Acquire a deep understanding of modern robotics concepts, principles, and technologies. Analyze and solve robot kinematics problems, including inverse kinematics to control robot motion.
		Introduce various sensors and perception technologies used in robotics, such as vision, LIDAR, and IMU sensors. Introduce programming languages and frameworks used for robot control, such as ROS.	Integrate various sensors into robotic systems for perception and environmental awareness. Select and utilize appropriate actuators for different robot applications.
		Showcase real-world applications of robotics in fields like manufacturing, healthcare, agriculture, and autonomous vehicles. Discuss the principles of human-robot interaction.	Apply robotics knowledge to solve complex problems and design innovative robotic solutions. Prepare for research and innovation in the field of modern robotics.
8	Fiancial Statement Analysis	Familiarize students with accounting principles and standards, such as Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS).	Gain a strong foundation in financial concepts, terminology, and reporting. Develop the skills to interpret and analyze financial statements accurately.
		Analyze income statements to evaluate a company's profitability and assess its ability to generate profits. Identify and evaluate financial risks, including credit risk, market risk, and liquidity risk.	Assess a company's profitability and the factors influencing its financial results. Understand a company's asset and liability composition and the implications for its financial stability.
		Develop the ability to interpret financial results and communicate findings effectively to stakeholders. Discuss ethical issues related to financial reporting and analysis.	Apply valuation techniques to determine the fair value of a company's assets or securities. Apply financial analysis skills to make informed investment or lending decisions.

9	Data Analytics	Introduce students to the basics of data, including types, sources, and data collection methods. Teach data cleaning techniques to handle missing data, outliers, and inconsistencies.	Develop a strong foundation in data concepts and terminology. Clean and preprocess data effectively for analysis.
		Introduce statistical methods for hypothesis testing, correlation analysis, and regression analysis. Introduce data mining techniques for pattern recognition and association rule mining.	Create compelling visualizations to communicate insights effectively. Understand the basics of machine learning and its applications in data analytics.
		Apply data analytics techniques to real-world datasets and case studies. Familiarize students with popular data analytics tools such as Python, R, SQL, and data visualization libraries.	Develop the ability to solve complex problems and make data-driven decisions. Provide insights and recommendations to support decision-making in various domains.

2. Personal Financial Planning – Introduction to Mutual Funds

Week	Module	Key Concepts
1	Module 1: Setting Financial Goals and Assessing Your Situation	SMART Goals; Personal Balance Sheet; Money Personalities; Values
	Module 2: Budgeting and Cash Flow Management	Personal Budgeting; Income and Expenses; Clash Flow Management
2	Module 3: Mutual Funds & Types	Mutual Funds, types, AMCs, Regulators of MF in India.
	Module 4: Mutual Funds and the Magic of Compounding	Term; Interest or Earning Rates; Time value of money; Present vs Future Values; Compounding Interest; Impact of compound interest on MF performance.
3	Module 5: Systematic Investment Plans	SIPs, significance, Working of SIPs, Challenges and advantages, Case Studies.
	Module 6: Portfolio management & Diversification	Diversification in mutual fund portfolios, strategies of investing in mutual funds,
4	Module 7: Risk Management	Risk Management Plan, Risk Tolerance Assessment, Risk in Mutual funds, counterfeiting risks, Risk return Trade off.
5	Module 8: Financial Planning as a Career	Careers in financial management, investment banking, portfolio management.

1. Entrepreneurship Development

About the Course

Entrepreneurship Management and Project Development course deals with the basic fundamentals of Entrepreneurial abilities and opportunities. This enables students in developing a craving for individual freedom, initiative and enterprise by pursuing self-employment and small business entrepreneurship as a viable alternative to salaried. This course helps them to become job creators than job seekers. This course includes a broad series of lessons and activities that offer a variety of modalities for ultimate student engagement and content retention. Each unit contains a series of lessons that include introduction of content, demonstration of that content, and repeated opportunities to practice that content and final exam at the end of the course.

Course Learning Objectives

To get an awareness about Entrepreneurship

To identify the social issue in a given scenario and apply models or arguments to justify their resolution

To know about the Institutions conducting EDPs in India

To motivate pursuing self-employment and small business entrepreneurship as a viable alternative to salaried employment

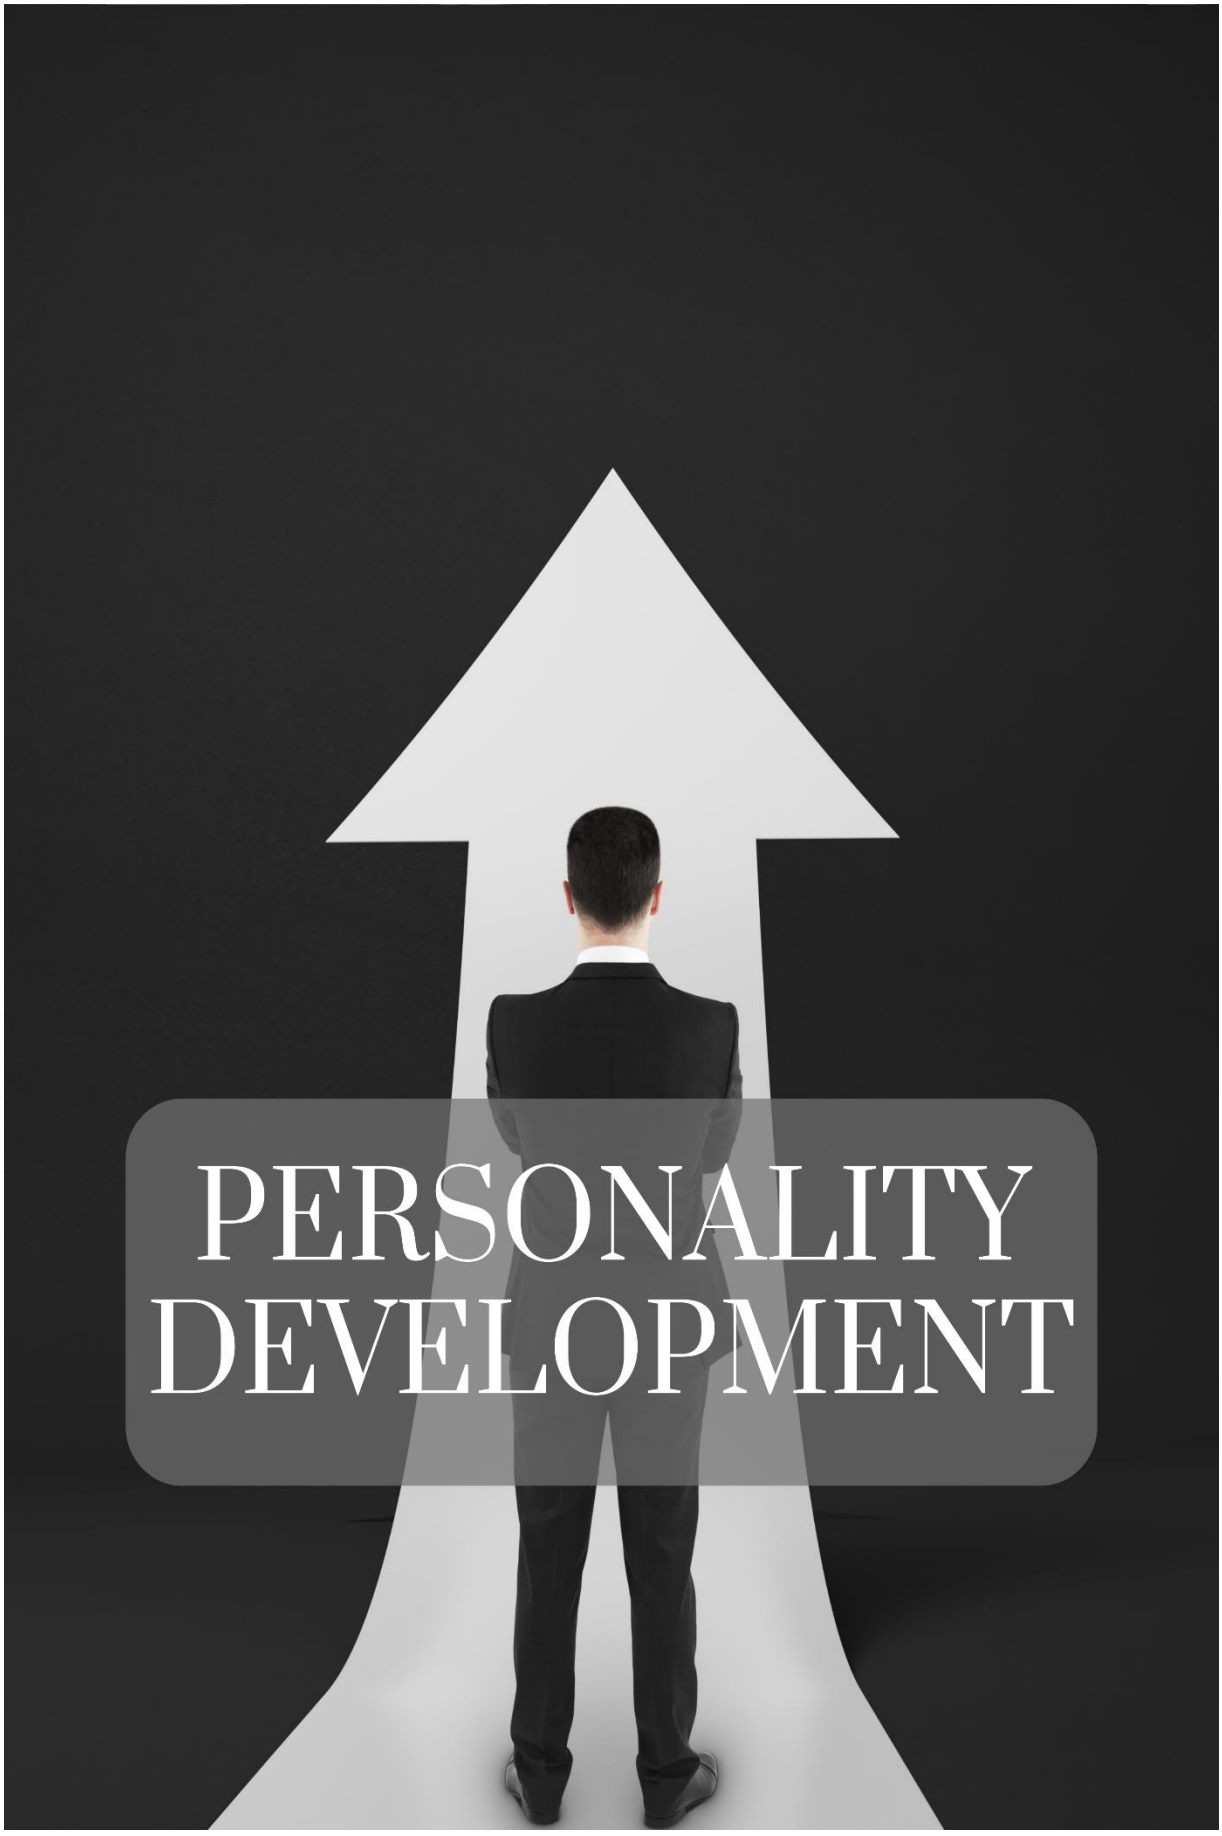

To formulate a Project Report

To perform their responsibilities with optimal use of available resources in a real-life social setting

Session Plan

Session	Topic/Assignment	Reading	Methodology
1-4	MODULE-1 - Entrepreneurship Definition Meaning-Concepts-Characteristics	PFD,SSK	Lecture/Brainstorming session

1. Course Title- "Personality Development and Communication Skills"

[30 Hours]

Unit 1: Spoken Skills – developing proficiency in English

- Tips for effective communication
- KISS (Keep it short and sweet) in communication – Composing effective messages.
- Words & phrases used for conversation: Making statements, questions, order & suggestions – denying –rejecting-disagreeing-possibility-ability, permission, obligations, etc.

Unit 2: Writing Skills

- Business report writing
- Formal letters, E-mail writing
- Content writing, Giving captions on social media
- Making attractive CV

Unit 3: Presenting yourself

- Etiquettes and public speech
- Confidence building tips
- Greeting and concluding, use of politeness markers
- Interview skills

Unit 4: Practical Session

Practical - Exercise on sentence constructions, Identification of the literary and grammatical devices from different texts like newspapers, poems, stories. Practice by reading & speaking, mock interviews, Roleplays/ Group discussions.

Recommended Books:

1. A Glossary of Literary Terms by M H Abrams
2. The Blue Book of Grammar and Punctuation by Jane Straus and Lester Kaufman
3. English Grammar for Today: A New Introduction – Margaret Deuchar, Geoffrey Leech, Robert Hoogenraad (Palgrave Macmillan, 1982)
4. Making Sense of English: A Textbook of Sounds, Words and Grammar – M.A. Yadugiri (New Delhi: Viva Books Pvt. Ltd., 2006).

Email : director@christcollegepune.org Web : www.christcollegepune.org

1. Basic object oriented concepts using C++

2. **Object Oriented concept & Introduction to C++ (Part 1)**

1.1. Object-oriented concept
1.2. Features, advantages, and Application of OOPS
1.3. Data types, new operations, and keywords using namespace concepts
1.4. Simple C++ program

3. **Introduction to C++ (Part 2)**

2.1. Classes and Objects
2.2. Access specifiers
2.3. Defining data members and member functions with inline functions
2.4. Type of constructors
2.5. Memory allocation (new and delete keywords)
2.6. Destructors
2.7. Introduction to the reference variable
2.8. Usage of 'this' pointer
2.9. Array of objects

4. **Function in C++**

3.1. Call by reference, return by reference
3.2. Function overloading and default arguments
3.3. Static class members
3.4. Friend classes and Friend functions

5. **Operator overloading**

4.1. Overloading unary and binary operators
4.2. Overloading using the friend function
4.3. Type casting and type conversion

6. **Inheritance**

5.1. Types of inheritances with examples
5.2. Constructor and destructor in derived classes
5.3. Virtual base classes, Virtual functions, and pure virtual functions
5.4. Abstract base classes
5.5. Polymorphism (only introductions)

7. **Managing I/O using C++**

6.1. Managing console I/O
6.2. C++ stream classes
6.3. Formatted and unformatted console I/O
6.4. Usage of manipulators

8. **Working with files**

7.1. File operation – Text files and Binary files
7.2. File stream classes and methods

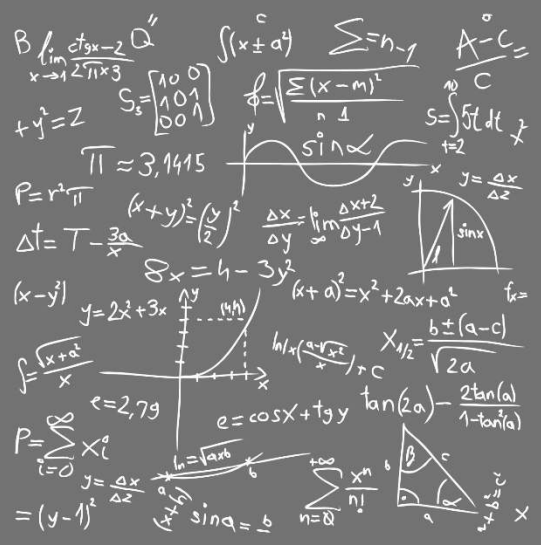

Cikshat College-Pune ★ Vision to Excel ★ खोईट महाविद्यालय-पुणे

7.3. File updation with random access
7.4. Overloading insertion and extraction operator

9. **Exception Handling in C++**

   Try, catch, and throw primitives with examples

4. Quantitative Aptitude

UNIT-I. Quantitative Ability (Basic Mathematics)

1.1. Number Systems
1.2. LCM and HCF
1.3. Decimal Fractions
1.4. Simplification
1.5. Square Roots and Cube Roots
1.6. Average
1.7. Problems on Ages
1.8. Surds & Indices
1.9. Percentages
1.10. Problems on Numbers

UNIT -II Quantitative Ability (Applied & Engineering Mathematics)

2.1 Logarithm
2.2 Permutation and Combinations
2.3 Probability
2.4 Profit and Loss
2.5 Simple and Compound Interest
2.6 Time, Speed and Distance
2.7 Time & Work
2.8 Ratio and Proportion
2.9 Area
2.10. Mixtures and Allegation

UNIT -III Data Interpretation

3.1 Tables
3.2 Column Graphs
3.3 Bar Graphs
3.4 Line Charts
3.5 Pie Chart
3.6 Venn Diagrams

UNIT –IV Logical Reasoning (Deductive Reasoning)

4.1. Analogy
4.2. Blood Relation
4.3 Directional Sense
4.4. Number and Letter Series
4.5. Coding — Decoding
4.6. Calendars
4.7. Clocks
