CARMEL VIDYA BHAVAN TRUST'S

CHRIST COLLEGE-PUNE

(Affiliated to Savitribai Phule Pune University)

CRITERIA I
Curricular Aspects

1.2.1 Number of Certificate/Value added courses offered and online courses of MOOCs, SWAYAM, NPTEL etc(Where the students of the institution have enrollrd and successfully completed during the last five years)

BROCHURES, NOTICES, MODULES & OUTCOMES

Submitted to
NationalAssessment and Accreditation Council

CARMEL VIDYA BHAVAN TRUST'S

CHRIST COLLEGE-PUNE

(Affiliated to Savitribai Phule Pune University)
Accredited by NAAC with 'B+' Grade

1.2 ACADEMIC FLEXIBILITY

1.2.1 Notice/Brochure/Modules with Outcomes of Certificate/Value Added Course(2022-23)

INDEX

Sr. No	Title
	Objective and Outcomes
1.	Cloud Computing • Brochure • Notice • Module
2.	Bussiness Communication Skills • Brochure • Notice • Module
3.	Object Oriented Programming and Project Management • Brochure • Notice • Module
4.	Financial Modeling • Brochure • Notice • Module
5.	Advanced Data Analytics • Brochure • Notice • Module

6.	Financial Statement Analysis • Brochure • Notice • Module
7.	Professional Accounting • Brochure • Notice • Module
8.	Stock Market • Brochure • Notice • Module
9.	GST Basic to Advance • Brochure • Notice • Module

11.	Introduction to Statistical Concepts in Economics • Brochure • Notice • Module
12.	Introduction to Google Workspace • Brochure • Notice • Module

CHRIST COLLEGE - PUNE

Affiliated to the Savitribai Phule Pune University

Accredited by NAAC with ' B+' Grade

Course Objectives & Course Outcomes

Year 2022 - 23			
Sr.NO	Name of Certificate/ Value added Add on course offered	Course Objectives	Course Outcome
1	Cloud Computing	Provide students with a foundational understanding of cloud computing concepts, history, and its significance in modern technology. Teach students how to manage cloud resources and orchestrate workflows efficiently.	Develop a strong foundation in cloud computing concepts, terminology, and principles. Gain familiarity with major cloud service providers and their core offerings.
		Explain the various cloud service models, including Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS).	Implement security measures to protect data and applications in the cloud. Effectively manage cloud resources, optimize costs, and automate tasks.
		Introduce serverless architecture and its advantages for building scalable and cost-effective applications. Discuss strategies and tools for migrating on-premises systems to the cloud and integrating cloud services.	Plan and execute cloud migrations and integrate cloud services with existing systems. Prepare for careers in cloud architecture, cloud administration, cloud development, and related roles.
2	Business Communication Skills	Provide students with a foundational understanding of communication principles and their importance in business. Teach students how to plan, design, and deliver compelling business presentations.	Communicate effectively in written and verbal forms in various business situations. Write clear, concise, and well-structured business documents with proper grammar and formatting.
		Develop proficiency in writing business documents, such as emails, memos, reports, and business letters. Foster effective communication within teams, emphasizing collaboration and synergy.	Listen attentively, ask clarifying questions, and respond empathetically in business conversations. Resolve conflicts and disputes constructively, fostering a harmonious work environment.
		Enhance active listening skills to understand others and respond appropriately in business conversations.Provide strategies for negotiation and persuasion in business dealings.	Enhance employability and career prospects through strong communication skills. Develop leadership and management capabilities by mastering communication in leadership roles.

3	Object Oriented Programming and Project Management	Introduce students to the foundational concepts of OOP, including classes, objects, encapsulation, inheritance, and polymorphism. Teach a specific programming language (e.g., Java, C++, Python)	Develop proficiency in OOP concepts, including class design, inheritance, and polymorphism. Create reusable code components and libraries for efficient software development.
		Develop problem-solving skills by applying OOP concepts to real-world programming challenges. Teach project planning techniques, such as creating project schedules, budgets, and resource allocation.	Apply OOP to solve complex programming problems and design efficient solutions. Effectively manage project teams, monitor progress, and address issues and risks.
		Explain project closure activities, including documentation, client handover, and lessons learned. Emphasize effective communication and collaboration within project teams.	Demonstrate leadership skills in managing software development projects.Apply OOP principles in the context of software project development, aligning coding practices with project management objectives.
4	Financial Modeling	Introduce students to the basic concepts, principles, and techniques of financial modeling. Develop proficiency in using Microsoft Excel as the primary tool for financial modeling.	Develop the ability to create, modify, and analyze financial models for various purposes. Become proficient in using Microsoft Excel for complex financial modeling tasks.
		Introduce various valuation models, such as discounted cash flow (DCF) and relative valuation, for asset and company valuation. Discuss risk assessment and sensitivity analysis to understand the uncertainties in financial models.	Perform scenario analysis to evaluate the impact of different scenarios on financial outcomes. Assess and mitigate financial risks through sensitivity analysis and stress testing.
		Enhance skills in interpreting financial data and using it to make informed decisions. Prepare students to use financial models to support business decisions, such as investment proposals and pricing strategies.	Communicate complex financial modeling results to stakeholders clearly and persuasively. Apply financial modeling skills to real-world financial scenarios and business cases.
5	Advanced Data Analytics	Teach advanced data preprocessing techniques, including handling missing data, outlier detection, and data imputation. Cover advanced statistical methods such as multivariate analysis, hypothesis testing, and regression analysis	Ability to clean, preprocess, and transform complex datasets for analysis. Apply advanced statistical methods to gain insights from complex data.
		Introduce advanced machine learning algorithms for classification, regression, clustering, and recommendation systems. Introduce technologies and tools for analyzing large-scale datasets	Create compelling visualizations to convey complex insights clearly. Understand and address ethical considerations in data analytics.Apply advanced analytics techniques to real-world business challenges.
		Advanced data visualization techniques for effectively communicating complex insights to stakeholders. Apply advanced data analytics techniques to real-world business problems and case studies.	Support data-driven decision-making in various domains and industries. Prepare for research and innovation in the field of advanced data analytics.

6	Financial Statement Analysis	Provide students with a comprehensive understanding of financial statements, including the income statement, balance sheet, and cash flow statement.	Gain a strong foundation in financial concepts, terminology, and reporting. Develop the skills to interpret and analyze financial statements accurately.
		Familiarize students with accounting principles and standards, such as Generally Accepted Accounting Principles (GAAP) or International Financial Reporting Standards (IFRS).	Analyze cash flow statements to evaluate a company's liquidity and cash management. Understand a company's asset and liability composition and the implications for its financial stability.
		Teach students how to assess the creditworthiness of companies and make informed lending or investment decisions. Discuss ethical issues related to financial reporting and analysis.	Understand the ethical considerations and responsibilities in financial statement analysis. Apply financial analysis skills to make informed investment decisions.
7	Professional Accounting	Introduce students to the fundamental principles and concepts of financial accounting, including the accounting equation, income statement, balance sheet, and cash flow statement.	Develop proficiency in financial and managerial accounting principles and practices. Prepare accurate and compliant financial statements for organizations.
		Familiarize students with auditing concepts, procedures, and standards, and the role of auditors in ensuring financial transparency and accuracy. Provide an overview of taxation principles, including income tax,etc.	Understand and apply auditing procedures and standards to assess the reliability of financial statements. Recognize and address ethical dilemmas and challenges in accounting practice.
		Teach students how to analyze financial statements to assess the financial health and performance of organizations and compliance requirements relevant to accounting and financial reporting.	Communicate financial information and analysis findings clearly and concisely to stakeholders. Prepare for careers in accounting, auditing, financial analysis, taxation, and related fields.
8	Stock Market	Provide students with a comprehensive understanding of what stock markets are and how they function. Introduce various investment instruments available in the stock market, including stocks, bonds, and derivatives.	Develop a strong foundation in stock market concepts, terminology, and operations. Understand different investment instruments and their characteristics. Evaluate and manage investment risk in stock market portfolios.
		Teach students how to analyze stock market trends, market indicators, and factors affecting stock prices. Cover different investment strategies, including value investing, growth investing, and dividend investing.	Analyze stock market trends, technical indicators, and economic factors influencing stock prices. Implement effective investment strategies aligned with financial goals and risk tolerance.
		Familiarize students with stock market regulations, ethical considerations, and investor protection. Conduct stock market simulations to provide hands-on experience in making investment decisions.	Understand ethical considerations and compliance with stock market regulations. Gain practical experience in making investment decisions through stock market simulations.

9	GST basic to advance	Provide students with an overview of the concept and significance of GST in taxation. Explain the GST structure, including CGST, SGST, and IGST, and their implications.	Gain a foundational understanding of GST concepts and its importance. Understand the GST registration process and its requirements.Utilize input tax credit effectively in GST calculations.
		Teach proper invoicing and documentation procedures to meet GST requirements. Introduce the E-way bill system and its relevance in the transportation of goods.	Classify goods and services correctly under GST tax slabs. Generate and manage E-way bills for the transportation of goods. Use GST accounting software for efficient compliance and reporting.
		Analyze the impact of GST on businesses, supply chains, and the economy. Cover GST implications for specific transactions, such as exports, imports, and reverse charge mechanisms.	Develop strategies for minimizing tax liabilities and optimizing GST management. Apply GST rules to special transactions like exports, imports, and reverse charge mechanisms.
10	Introduction to SPSS	Provide students with an overview of SPSS software, its interface, and its capabilities for data analysis. Teach students how to import data from various sources, such as Excel, CSV files, and databases, into SPSS.	Develop proficiency in using SPSS software for data analysis and manipulation. Import data into SPSS and prepare it for analysis, addressing issues like missing data and outliers.
		Introduce students to basic descriptive statistical methods, including measures of central tendency and dispersion. Explore data visualization techniques in SPSS, such as creating charts and graphs.	Create informative data visualizations and charts using SPSS. Perform hypothesis tests and interpret the results in SPSS. Understand and apply nonparametric tests in SPSS when parametric assumptions are not met.
		Discuss techniques for analyzing survey data and creating summary reports. Guide students in interpreting the results and output generated by SPSS analyses.	Use SPSS to support data-driven decision-making in research and analysis. Prepare for research projects and data analysis tasks that require SPSS skills.Create clear and concise reports of data analyses conducted in SPSS.
11	Introduction to Statistical Concepts in Economics	Develop a foundation in statistical concepts and terminology relevant to economics. Understand the sources of economic data and learn how to collect and organize economic data effectively.	Develop a strong foundation in statistical concepts and terminology relevant to economics. Collect, organize, and manage economic data effectively for analysis.
		Students will learn to create and interpret graphs and charts to visually represent economic data. Provide an introduction to probability theory and its application to economic events and outcomes.	Create and interpret graphical representations of economic data. Apply sampling methods to collect economic data and make inferences.
		Introduce basic econometric models for understanding and analyzing economic data. Teach students how to interpret economic data critically and draw meaningful conclusions.	Prepare students for economic research projects and data analysis tasks. Use statistical concepts to support data-driven decision-making in economic analysis.

12	Introduction to Google Workspace	Provide an overview of Google Workspace and its suite of productivity and collaboration tools. Introduce Google Docs for creating and editing text documents.	Develop proficiency in using Google Workspace tools effectively. Manage emails efficiently using Gmail's features for organization and communication. Create, format, and edit text documents in Google Docs.
		Explain how to use Google Drive for cloud-based file storage and sharing. Cover Google Calendar for scheduling and time management.	Design and deliver engaging presentations with Google Slides. Effectively store, organize, and share files in Google Drive. Collaborate with others in real time and share documents seamlessly.
		Introduce communication tools like Google Meet and Google Chat for video conferencing and instant messaging. Explain how to access Google Workspace tools on mobile devices for on-the-go productivity.	Access and work on Google Workspace documents and communications using mobile devices. Gain the skills needed for remote work and virtual collaboration using Google Workspace.

Dr (Fr) Arun Antony Chully, CMI

(Principal/Director)

CLOUD COMPUTING

Wadgaon Sheri, Pune, Maharashtra 411014 contact: +91 9823888322 / +91 9637115409

2022 - 2023

DEPARTMENT OF SCIENCE

CLOUD COMPUTING

CARMEL VIDYA BHAVAN TRUST'S

CHRIST COLLEGE - PUNE

(Affiliated to the Savitribai Phule Pune University)

ID-No. PU/PN/ASC/269/2007, College Code-829

26/4A, Sainikwadi, Vadgaon Sheri, Pune 411 014.

Accredited by NAAC with 'B+' Grade

Ref. No. CCP/ 163/2023

Date: 20/02/2023

NOTICE

DEPARTMENT OF SCIENCE

All the students of TY Bsc (CS) are hereby informed that Department of Science, conducting Certificate Distribution Ceremony of "Cloud Computing" Add-on Course on 21st February 2023 for academic year 2022-23.Students are requested to Present in Smart room at10:00 AM.

Ms. Nilima Shingte
HOD
Dept. of Science

Hematite Infotech
Private Ltd.

2ndFloor Mathura Nagar Housing Society,
Sr.no-47, Plot no-39, Near Janseva Sahakari
Bank, Chandan Nagar, Kharadi-411014

Phone no: 91 - 8263926309/8999639478, Email: contact@hematitecorp.com , Website: www.hematitecorp.com

Basic Cloud Computing Syllabus

Chapter-1

Overview of Computing Paradigms

1.1 Recent trends in Computing

a) Grid Computing
b) Cluster Computing
c) Distributed Computing
d) Utility Computing

1.2 Cloud Computing

a) Evolution of Cloud Computing
b) Business driver for adopting cloud computing

Chapter-2

Introduction of Cloud Computing

- **Cloud Computing (NIST Model)**

a) Traditional Hosting
b) Origin of Cloud computing
c) Introduction to Cloud Computing
d) Cloud service providers.

- **Properties, Benefits & Challenges**

a) Characteristics
b) Pros and Cons of Cloud Computing
c) Benefits of Cloud Computing

Hematite Infotech
Private Ltd.

2ndFloor Mathura Nagar Housing Society,
Sr.no-47, Plot no-39, Near Janseva Sahakari
Bank, Chandan Nagar, Kharadi-411014

Phone no: 91 - 8263926309/8999639478, Email: contact@hematitecorp.com , Website: www.hematitecorp.com

Chapter-3

Cloud Computing Architecture

- **Cloud Architecture**
  a) Cloud computing stack
  b) Front End Devices
  c) Back End Services.
- **Service Models (XaaS)**
- **Infrastructure as a Service (IaaS)**
- **Platform as a Service (PaaS)**
- **Software as a Service (SaaS).**
- **Deployment Models: Public cloud, Private cloud, Hybrid cloud, Community cloud**

Chapter-4

Virtualization

- **Introducing the Force.com Platform**
- **Understanding the basics of application with Standard Object**
- **Understanding Service cloud**

Chapter-5

Object and Field Virtualization and Cloud Computing

- **Need of virtualization**
  a) cost
  b) administration
  c) fast deployment
  d) reduce infrastructure cost

Hematite Infotech Private Ltd.

2ndFloor Mathura Nagar Housing Society, Sr.no-47, Plot no-39, Near Janseva Sahakari Bank, Chandan Nagar, Kharadi-411014

Phone no: 91 - 8263926309/8999639478, Email: contact@hematitecorp.com , Website: www.hematitecorp.com

- **Hardware virtualization**
    a) Full virtualization-partial virtualization - para virtualization
- **Software Virtualization.**
- **Virtualization**
- **Service Oriented Architecture**
- **Grid Computing and Utility Computing**
- **Technologies behind Cloud**

Chapter-6

Overview of Cloud Security

- **Threats on Cloud Computing**
    a) Data Breaches, Data Loss, Account Hijacking, Insecure APIs, Denial of Service, Malicious Insiders, Abuse of Cloud Services, Insufficient Due Diligence, Shared Technology Issues.
- **Cloud Security Guidance**
    a) Critical Domains, Issues, Possible Solutions.

Chapter-7

Multi Cloud and Business Cloud

- **Multi Cloud Strategy**
    a) Concept, Need, Benefits and Challenges of Multi Cloud Environment.
- **Cloud Computing in Business**
    a) Benefits of Business over cloud
    b) Business Intelligence
    c) Big Data Analytics on Cloud
    d) Cloud on Business Domains: Retail, HR, Finance, Education etc.

Hematite Infotech
Private Ltd.

2ndFloor Mathura Nagar Housing Society,
Sr.no-47, Plot no-39, Near Janseva Sahakari
Bank, Chandan Nagar, Kharadi-411014

Phone no. 91 - 8263926309/8999639478, Email: contact@hematitecorp.com , Website: www.hematitecorp.com

Chapter-8

Future Direction and Case Study

- Future Technology trends in Cloud Computing with the focus on Service Models, Deployment Models
- Technology usage, Applications and security.
- Case Study on Open stack, IBM BLUEMIX AND AmazonEC2

Activities:

1) Students created AWS A/c using their own credentials for conducting assignments and practical's.

2) Students now know how to create Instance on AWS platform and run with the help of local server.

3) Created O/S using Python with the help of Linux /Ubuntu.

4) Students created a Web page of Christ College image which was downloaded from the Google using HTML.

5) Students are now aware of AWS Global Infrastructure with the help of flow chart.

6) Students appeared for the final certification test on the http://hematitecopr.com/onlineQuiz#/ in which exclusive voucher code M3FXYS was shared. The exam was conducted for 50 marks.

CLOUD COMPUTING WORKSHOP FOR CHRIST COLLEGE WADGAON SHERI PUNE - 410014

From 19th Oct 2022 to 7th Dec 2022

Date	Day	Hours	Topics Covered
19/10/2022	Saturday	2 hours	**1. 1 Recent trends in Computing** a) Grid Computing b) Cluster Computing c) Distributed Computing d) Utility Computing **1.2 Cloud Computing** a) Evolution of Cloud Computing b) Business driver for adopting cloud computing c) Building block in cloud application d) Types: * Server Model * Deployment Model e) Different cloud services provider .
04/11/2022	Friday	2 hours	• **AWS Ec2**: - Elb (Elastic load Blancing) Elastic IP address Elastic Block storage Elastic Cloud Service Connect, Putty, RDP • **Ec2 Instance Types**: - e) General Purpose f) Memory Optimized Instance g) Compute Optimize Instances

			h) Accelerated Compute Instances i) Storage Optimization • Ec2 Pricing: - a) On Demand b) Ec2 Saving Plan c) Reserved Ec2 d) Spot Instances
05/11/2022	Saturday	3 hours	2.1 **Cloud Computing (NIST Model)**: - a) Introduction b) Concepts and Diagram for NIST Model • **Communication Session**: - 1. Resume Building 2. Introduction and presentation 3. Explaining Interview question scenario. • Individual AWS A/c creation with student's credentials and Overview of AWS platform.
16/ 11 /2022	Wednesday	3 hours	**Cloud Computing (NIST Model): -** c) Traditional Hosting d) Origin of Cloud Computing e) Cloud Service provider f) Properties benefits and Challenges g) Advantages & Disadvantages • NIST Cloud Computing /Architecture (actors) 1 Cloud consumer 2. Cloud Producer 3. Cloud Carrier

			4. Cloud Auditor 5. Cloud Broker
17/ 11 /2022	Thursday	2 hours	• Revision of Cloud Computing Concepts. • Overview of AWS Platform and rectified the errors on A/c opening for AWS Platform on local server.
21/11 /2022	Monday	3 hours	4.1 **Virtualization** 1. Introduction the Force.com Platform 2. Introduction of MVC Architecture 2.1 Model 2.2 View 2.3 Controller 4. Features • Assignment of Webpage creation using HTML
22/ 11/2022	Tuesday	2:30 hours	5. **Object and Field Virtualization and Cloud Computing** 5.1 Need of Virtualization a) Cost b) Administration c) Fast Deployment d) Reduce infrastructure cost 5.2 Hardware Virtualization a) Full Virtualization-partial virtualization-Para virtualization 5.3 AWS fundamentals a) Scalability

			b) Availability c) Vertical Scalability d) Horizontal Scalability e) High Availability Load Balancing, Types of Load Balancing, Load Balancer on AWS, Types of Load Balancers, Application of Load Balancer. 5.4 AWS RDS Overview: - Advantages, RDS security encryption, RDS Operation, Summary.
23/ 11/2022	Wednesday	2 hours	**6. Overview of Cloud Security** 6.1 Data Breaches, Data Loss, Account Hijacking, Insecure APIs, Denial services, Malicious insiders, Shared Technology issues. 6.2 Cloud Security Guidance a) Critical Domains b) Issues c) Possible Solutions • Assignment done on creation of free operating systems (Linux 1 / Ubuntu) using access install python in machine and write simple program.
02/ 12 /2022	Friday	3 hours	**7. Multi Cloud and Business Cloud** • Concepts • Need

Christ College-Pune
Enlighten to Excel

			• Benefits • Challenges of Multi Cloud Environment 7.1 AWS Global Infrastructure a) AWS Regions b) AWS Availability Zones c) AWS Datacenters d) AWS Edge Locations e) Points of Presence. • Created AWS Global Infrastructure with the help of flow chart (Diagram)
05/12 /2022	Monday	2 hours	**8. Future Direction and Case Study** 8.1 Future Technology trends in cloud Computing with the focus on Service models, Deployment Models. 8.2 IAM Section a) I Am user and groups b) I AM permissions c) I AM policies inheritance d) I Am policy structure using program ITive way e) Case study on Amazon Ec2/ IBM 8.3 MFA (Multi Factor Authentication) • Assignment on I AM User Creation Process by AWS
06/12 /2022	Tuesday	3 hours	• Short Notes on AWS, EC2, ELB, Elastic IP address, EBS, what is cloud Computing and its types, • NIST Diagrams • Revision for final Test on all the topic covered during the sessions.

Christ College-Pune
Enlighten to Excel
ख्रिस्त महाविद्यालय पुणे

07/12 /2022	Wednesday	3 hours	Created Individual User ID using personal email address and shared exam link and voucher code for each individual.

Module Title: Business Communication Skills

Duration: 30 hours (10 sessions of 3 hours each)

Module Description:

This module is designed to enhance your business communication skills, both written and verbal, to excel in professional settings. You will learn the fundamentals of effective communication, including interpersonal skills, presentation techniques, and business writing.

Session 1: Introduction to Business Communication (3 hours)

- Importance of effective communication in the business world
- Types of business communication
- Communication barriers and how to overcome them

Session 2: Verbal Communication (3 hours)

- Active listening skills
- Non-verbal communication cues
- Effective speaking and voice modulation

Session 3: Written Communication (3 hours)

- Business writing fundamentals
- Email etiquette and best practices
- Writing professional memos and letters

Session 4: Interpersonal Communication (3 hours)

- Building and maintaining professional relationships
- Conflict resolution and negotiation skills
- Empathy and understanding diverse perspectives

Session 5: Presentation Skills (3 hours)

- Planning and structuring effective presentations
- Using visual aids and technology in presentations

Handling questions and feedback

Session 6: Effective Meetings (3 hours)

Preparing for meetings and setting agendas

Leading and participating in meetings

Taking meeting minutes and follow-up

OBJECT ORIENTED
PROGRAMMING &

C++ syllabus

1. **Object Oriented concept & Introduction to C++ (Part 1) [4 hrs → 4 days]**

1.1. Object-oriented concept	Day 1
1.2. Features, advantages, and Application of OOPS	
1.3. Data types, new operations, and keywords using namespace concepts	Day 2
1.4. Simple C++ program	

2. **Introduction to C++ (Part 2) [8 hrs → 8 days]**

2.1. Classes and Objects	Day 3
2.2. Access specifiers	
2.3. Defining data members and member functions with inline functions	
2.4. Type of constructors	
2.5. Memory allocation (new and delete keywords)	Day 4
2.6. Destructors	
2.7. Introduction to the reference variable	
2.8. Usage of 'this' pointer	
2.9. Array of objects	Day 5

3. **Function in C++ [8 hrs → 8 days]**

3.1. Call by reference, return by reference	Day 6
3.2. Function overloading and default arguments	
3.3. Static class members	Day 7
3.4. Friend classes and Friend functions	

4. **Operator overloading [8 hrs → 8 days]**

4.1. Overloading unary and binary operators	Day 8
4.2. Overloading using the friend function	Day 9
4.3. Type casting and type conversion	Day 10

5. **Inheritance [8 hrs → 8 days]**

5.1. Types of inheritances with examples	Day 11
5.2. Constructor and destructor in derived classes	
5.3. Virtual base classes, Virtual functions, and pure virtual functions	Day 12
5.4. Abstract base classes	
5.5. Polymorphism (only introductions)	Day 13

6. **Managing I/O using C++ [4 hrs → 4 days]**

6.1. Managing console I/O	Day 14
6.2. C++ stream classes	
6.3. Formatted and unformatted console I/O	Day 15
6.4. Usage of manipulators	

C++ syllabus

1. **Object Oriented concept & Introduction to C++ (Part 1) [4 hrs → 4 days]**

1.1. Object-oriented concept	Day 1
1.2. Features, advantages, and Application of OOPS	
1.3. Data types, new operations, and keywords using namespace concepts	Day 2
1.4. Simple C++ program	

2. **Introduction to C++ (Part 2) [8 hrs → 8 days]**

2.1. Classes and Objects	Day 3
2.2. Access specifiers	
2.3. Defining data members and member functions with inline functions	
2.4. Type of constructors	
2.5. Memory allocation (new and delete keywords)	Day 4

5.2. Constructor and destructor in derived classes	
5.3. Virtual base classes, Virtual functions, and pure virtual functions	Day 12
5.4. Abstract base classes	
5.5. Polymorphism (only introductions)	Day 13

6. **Managing I/O using C++ [4 hrs → 4 days]**

6.1. Managing console I/O	Day 14
6.2. C++ stream classes	
6.3. Formatted and unformatted console I/O	Day 15
6.4. Usage of manipulators	

C++ syllabus

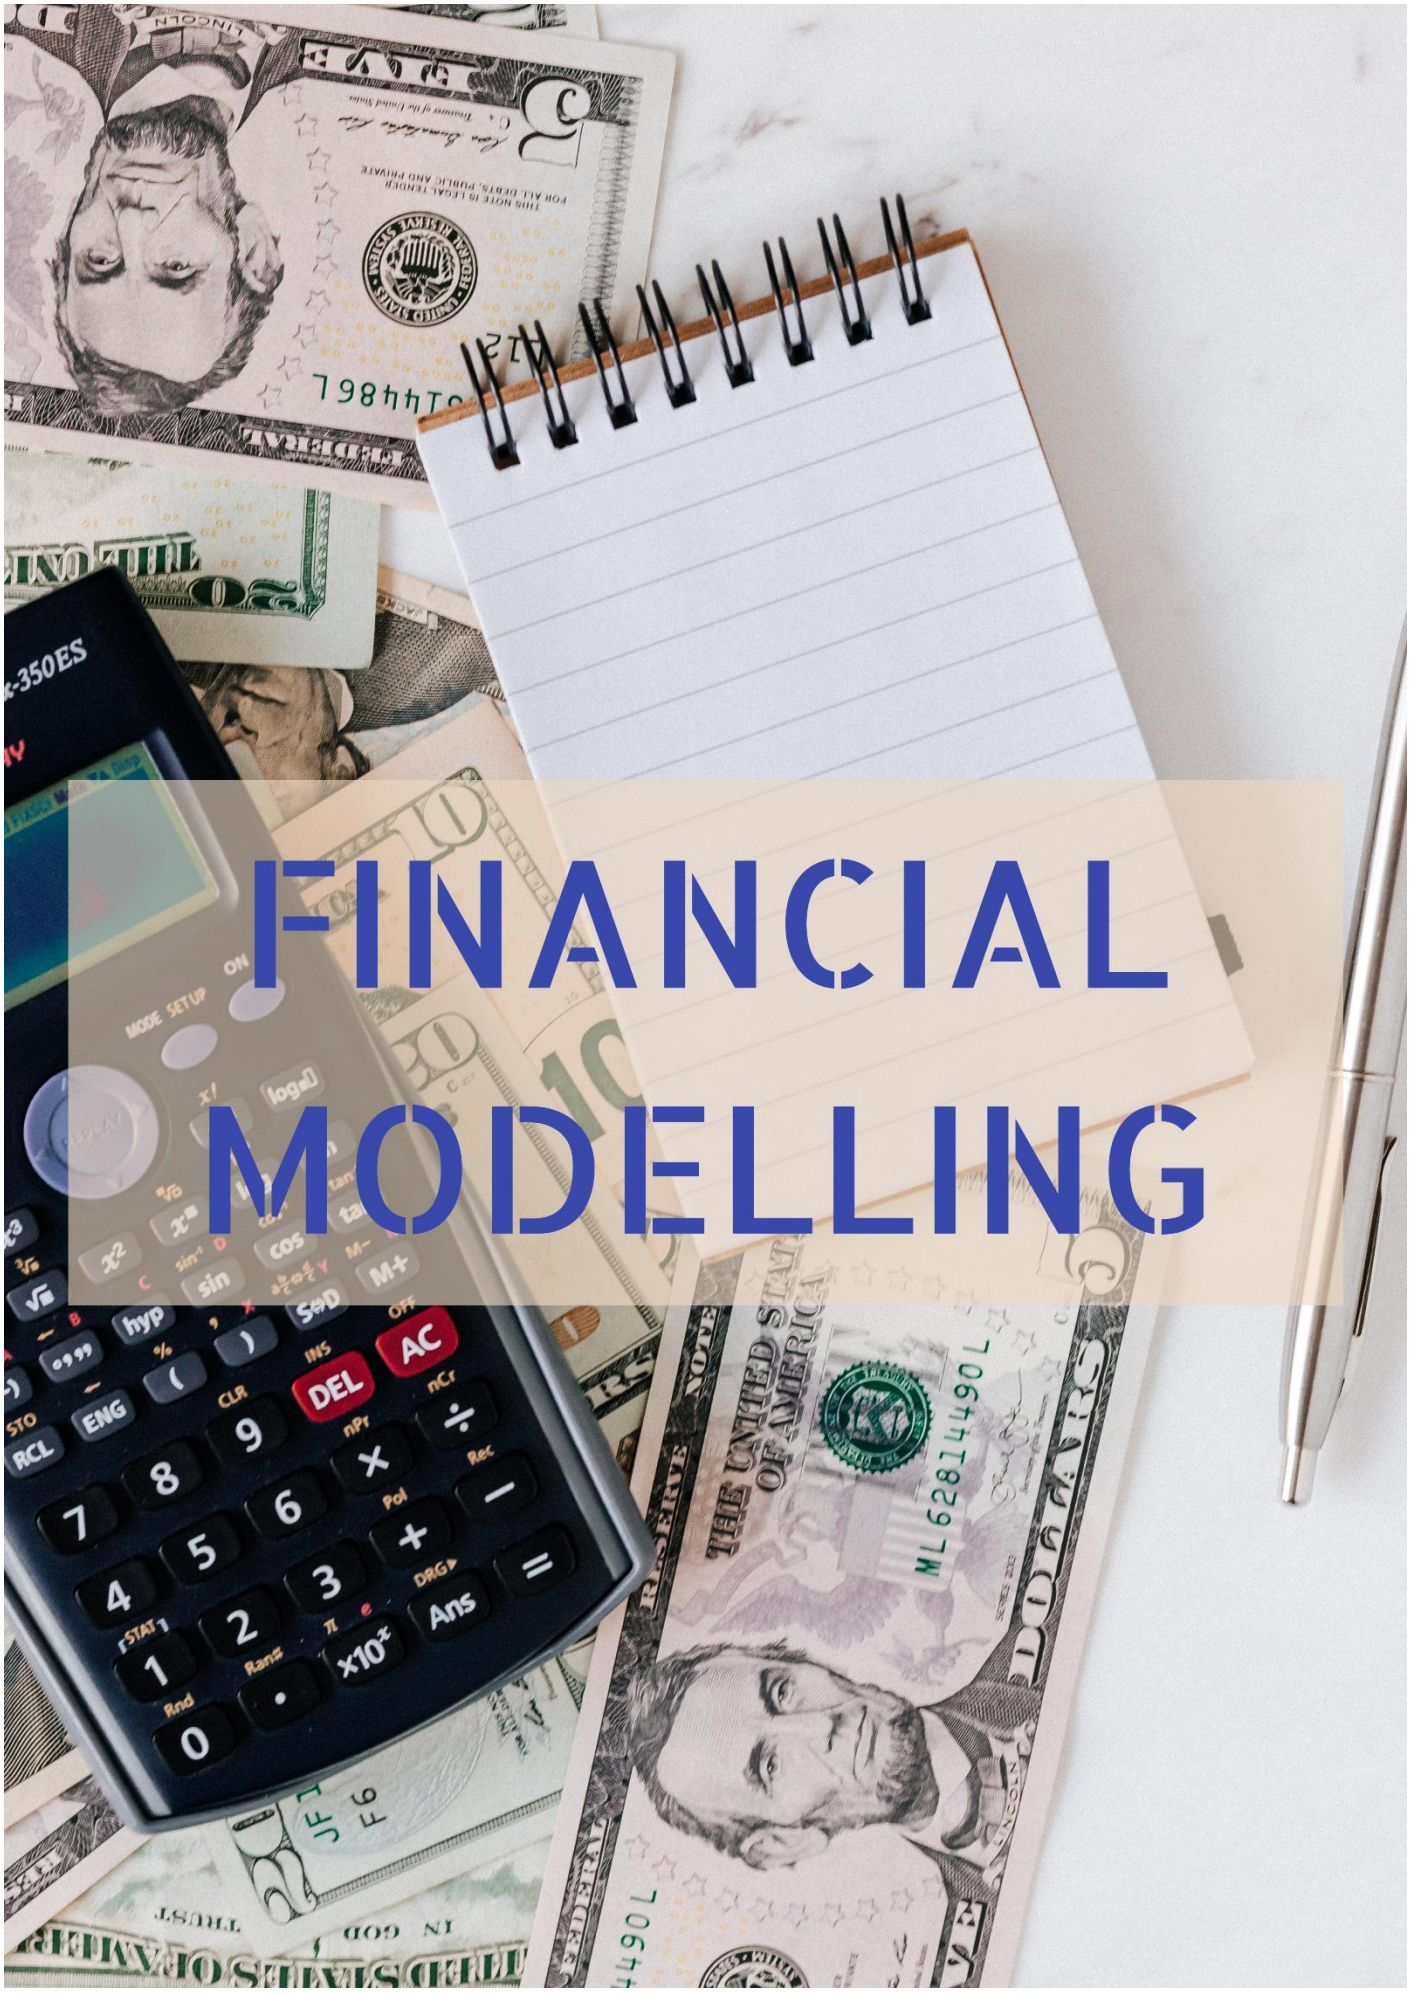

7. Working with files [6 hrs → 6 days]

7.1. File operation – Text files and Binary files	Day 16
7.2. File stream classes and methods	
7.3. File updation with random access	Day 17
7.4. Overloading insertion and extraction operator	

8. Exception Handling in C++ [2 hrs → 2 days]

8.1. Try, catch, and throw primitives with examples	Day 18

FINANCIAL MODELLING

CHRIST COLLEGE PUNE
Department of Management
Financial Modeling

Course Description:
This course introduces students to the fundamentals of financial modeling, enabling them to build and analyze financial models commonly used in business and finance. It is designed for first-year undergraduate students with no prior modeling experience.

Unit 1: Introduction to Financial Modeling **(10 hours)**
- What is Financial Modeling?
- The Role of Financial Models in Decision-Making
- Building a Financial Model Framework
- Excel Basics for Financial Modeling
- Best Practices in Financial Modeling

Unit 2: Building Financial Models **(10 hours)**
- Forecasting Techniques and Assumptions
- Creating Income Statement Projections
- Building a Cash Flow Statement
- Developing a Balance Sheet Projection
- Sensitivity Analysis and Scenario Planning

Unit 3: Advanced Financial Modeling and Applications **(10 hours)**
- Time Value of Money (TVM) in Financial Modeling
- Valuation Models: Discounted Cash Flow (DCF)
- Equity and Debt Financing Models
- Investment Analysis using Financial Models
- Real-World Applications and Case Studies

Assessment Methods:
- Class Participation and Engagement
- Model-building Exercises
- Midterm Assessment
- Group Project: Building a Financial Model
- Final Examination (Comprehensive)

Grading:
- Class Participation: 10%
- Model-building Exercises: 20%
- Midterm Assessment: 20%
- Group Project: 30%
- Final Examination: 20%

Course Policies:
- Regular attendance is required.
- Late submissions may result in grade deductions.
- Academic integrity is expected, and plagiarism is strictly prohibited.
- Students are encouraged to seek clarification during office hours or via email for any course-related questions.

Syllabus of Data Analytics

Chapter 1:

Introduction to Data Analytics

- Introduction to Data Analytics
- What is Power BI
- What is Power BI Desktop
- Installing Power BI Desktop
- Microsoft 365 Setup
- Exploring Microsoft 365
- Add users to Microsoft 365

Chapter 2:

Power BI Overview

- Exploring Power BI Interface
- Power BI Overview: Part 1
- Power BI Overview: Part 2
- Power BI Overview: Part 3
- Components of Power BI
- Building blocks of Power BI
- Exploring Power BI Service
- Power BI Apps

Chapter 3:

Connecting Power BI to Data Source

- Connecting to web based data
- Clean and transform data: Part 1
- Clean and transform data: Part 2
- Combining Data Source

Chapter 4:

Creating Visualizations and Dashboard with Power BI

- Creating Visualizations: Part 1
- Creating Visualizations: Part 2
- Publish report and create dashboards

Chapter 5:

Transforming Data with Power BI and Power Query

- Connecting to Data Source
- Power Query Editor and Queries
- Creating and managing query groups
- Renaming Queries
- Splitting Columns
- Changing Data Types
- Removing and Reordering Columns
- Duplicating and Adding Columns
- Creating Conditional Columns
- Connecting to files in a folder
- Appending Queries
- Merge Queries
- Query Dependency View
- Transform less structured data
- Create Tables
- Query Parameters

Chapter 6:

Data Modelling with Power BI

- What is Data Modelling
- Creating and managing Data Relationships
- Creating Calculated Columns
- Optimizing Models for Reporting
- Time Intelligence
- Applying Filters to Visuals

Chapter 7:

Tableau Setup

- What is Tableau
- Tableau Public Desktop
- Tableau Public Desktop Overview: Part 1
- Tableau Public Desktop Overview: Part 2
- Tableau Online
- Tableau Data Sources
- Tableau File Types
- Tableau Interface

Chapter 8:

Data Analysis and Visualization with Tableau

- Connecting to data source
- Join related data sources
- Join data sources with inconsistent fields
- Cleaning data
- Reordering Visualization
- Change Summary
- Split text into multiple columns
- Presenting data using stories

Chapter 9:

Case Studies and Assignments

Financial Statement Analysis

Course Description:

This course introduces fundamental concepts of financial statement analysis, aimed at equipping first-year undergraduate students with the knowledge and skills to interpret and analyze financial statements for decision-making purposes.

Unit 1: Introduction to Financial Statements (10 hours)
- Understanding Financial Statements: Income Statement, Balance Sheet, Cash Flow Statement
- The Purpose and Importance of Financial Statement Analysis
- Users of Financial Statements
- Basic Accounting Principles
- Financial Reporting Standards

Unit 2: Analyzing Financial Statements (10 hours)
- Analyzing the Income Statement:
  - Revenue Recognition
  - Expenses and Net Income
  - Earnings per Share (EPS)
- Analyzing the Balance Sheet:
  - Assets, Liabilities, and Equity
  - Current and Non-current Assets
  - Long-term Debt and Equity
- Basic Ratios: Liquidity, Profitability, Solvency

Unit 3: Financial Statement Interpretation and Decision-Making (10 hours)
- Vertical and Horizontal Analysis
- Common-Size Statements
- Trend Analysis
- Introduction to Cash Flow Statement
- Using Ratios for Decision-Making
- Practical Application and Case Studies

Assessment Methods:
- Class Participation and Engagement
- Short Quizzes
- Group Presentation or Project
- Final Examination (Comprehensive)

Grading:
- Class Participation: 10%
- Short Quizzes: 20%
- Group Presentation or Project: 30%
- Final Examination: 40%

Course Policies

Course on Professional Accounting

Introduction

Tally is an accounts software used for maintaining business accounts and personal accounts. Tally's software is mainly used for vouchers, financial statements, and taxation in many industries, and has specialized packages for retail businesses. It is a way of computerizing your accounts.

Syllabus subjects and objectives

a. Basics of Accounting in Tally
b. Principles and concepts of Accounting
c. Double Entry System of Accounting
d. Financial Statements
e. Fundamentals of Tally.ERP 9
f. Salient Features of Tally.ERP 9
g. Key Components of Tally.ERP 9
h. How to start and exit Tally.ERP 9
i. Setting up a company in Tally.ERP 9
j. Working with companies in Tally.ERP 9
k. Creating Accounting Masters in Tally.ERP 9
l. The basic functions of Tally.ERP 9
m. F11: Features & F12: Configurations
n. Creating and Maintaining Chart of Accounts
o. Entering the opening balances for Ledgers
p. Voucher Entry in Tally.ERP 9
q. Describe the purpose of the Tally.ERP 9 Accounting Vouchers
r. Create and alter Accounting Vouchers
s. Use vouchers to enter accounting transactions
t. Describe the use of Non-Accounting Vouchers
u. Advanced Accounting in Tally.ERP 9
v. Use of final statements
w. Use of shortcut keys
x. Finalization of accounts

Objectives -:

1. To impart the knowledge of various accounting concepts
2. To instill the knowledge about accounting procedures, methods and techniques.
3. To acquaint them with practical approach to accounts writing by using software package. (Tally and MS Office Excel and Word)

Course outcomes

Students will be able to
1. Gain knowledge in maintaining the books of accounts of daily transactions.
2. Enable the students to learn about the technology-oriented recording of accounting transactions
3. Discover, nourish and to explore the practical oriented learning techniques.

Stock Market Course

Introduction

Students of commerce have a lot of theoretical knowledge on stock market, investments and other financial matters. They lack practical aspect of the financial markets and institutions as well as importance of investments as an aspect of personal financial management. In addition, very few students seek employment in this field. In this context giving them a practical approach to stock market and investments becomes necessary and handhold them for employment and personal financial management is the purpose of this course.

Objectives of the Course:

1. To learn about investment and stock market
2. To know terminologies and functioning of stock market
3. To train and equip participants to operate independently in the stock market
4. To independently analyze financial investment and its prospects

Outcomes of the Course:

1. The students will be able to:
2. Learn essential aspects of stock market operations.
3. Train them to open a demat and trading account by themselves and operate independently in the market.
4. Equip themselves to find out the market sentiments and evaluate performance of financial investment for oneself and for others.
5. Seek employment in financial markets as stock market operators, consultants of stocks, mutual funds and other financial investments.

Certificate Course on Goods and Service Tax – Basic to Advanced

INTRODUCTION

The Government has carry out indirect tax reform i.e. Goods and Services Tax from 1st July 2017. The SPPU as part of graduation program implemented additional credit for students. Taking this opportunity, the course is designed to help students to understand the essentials of this new law on GST basic to advance. The objective of this Course is to enhance the knowledge and understanding on GST laws, registration, filing of GST etc from a practical point of view.

OBJECTIVE OF THE COURSE

To give overall understanding of GST from basics to advanced level
To identify components of GST in purchase and sales
To understand filing of GST returns and file returns

COURSE OUTCOMES

1.To demonstrate comprehensive and understanding of the areas and the concept of the goods and services tax.
2. To understand the origin and history about the tax.
3. To analyse and to discuss the various legal and regulatory rules about the payment of tax
4. To discuss and to apply the practical implication of filing gst.

ELIGIBILITY

Whoever would like to know and understand GST.
An additional online credit course for graduate students

COURSE DURATION

60 hours (offline and online)

COURSE CONTENT

GST basic to advanced level of learning (Detailed syllabus is attached)

RESOURCES

Published documents of ICAI and other official bodies
Published and reviewed videos channels of you tube
Newspapers and journals
Expert training

MODE OF DELIVERY

Face to Face training and Online recorded classes with support by the faculty
Evaluation
After attending each module for at least 60% of materials, a quiz will be opened to test the level of understanding which will be marked for assessment
At least two assignments based on the practical aspects of GST is given to know practical understanding of GST
Participation in the discussion forum on various current issues will be assessed
A comprehensive multiple choice questions will be conducted at the end of the course

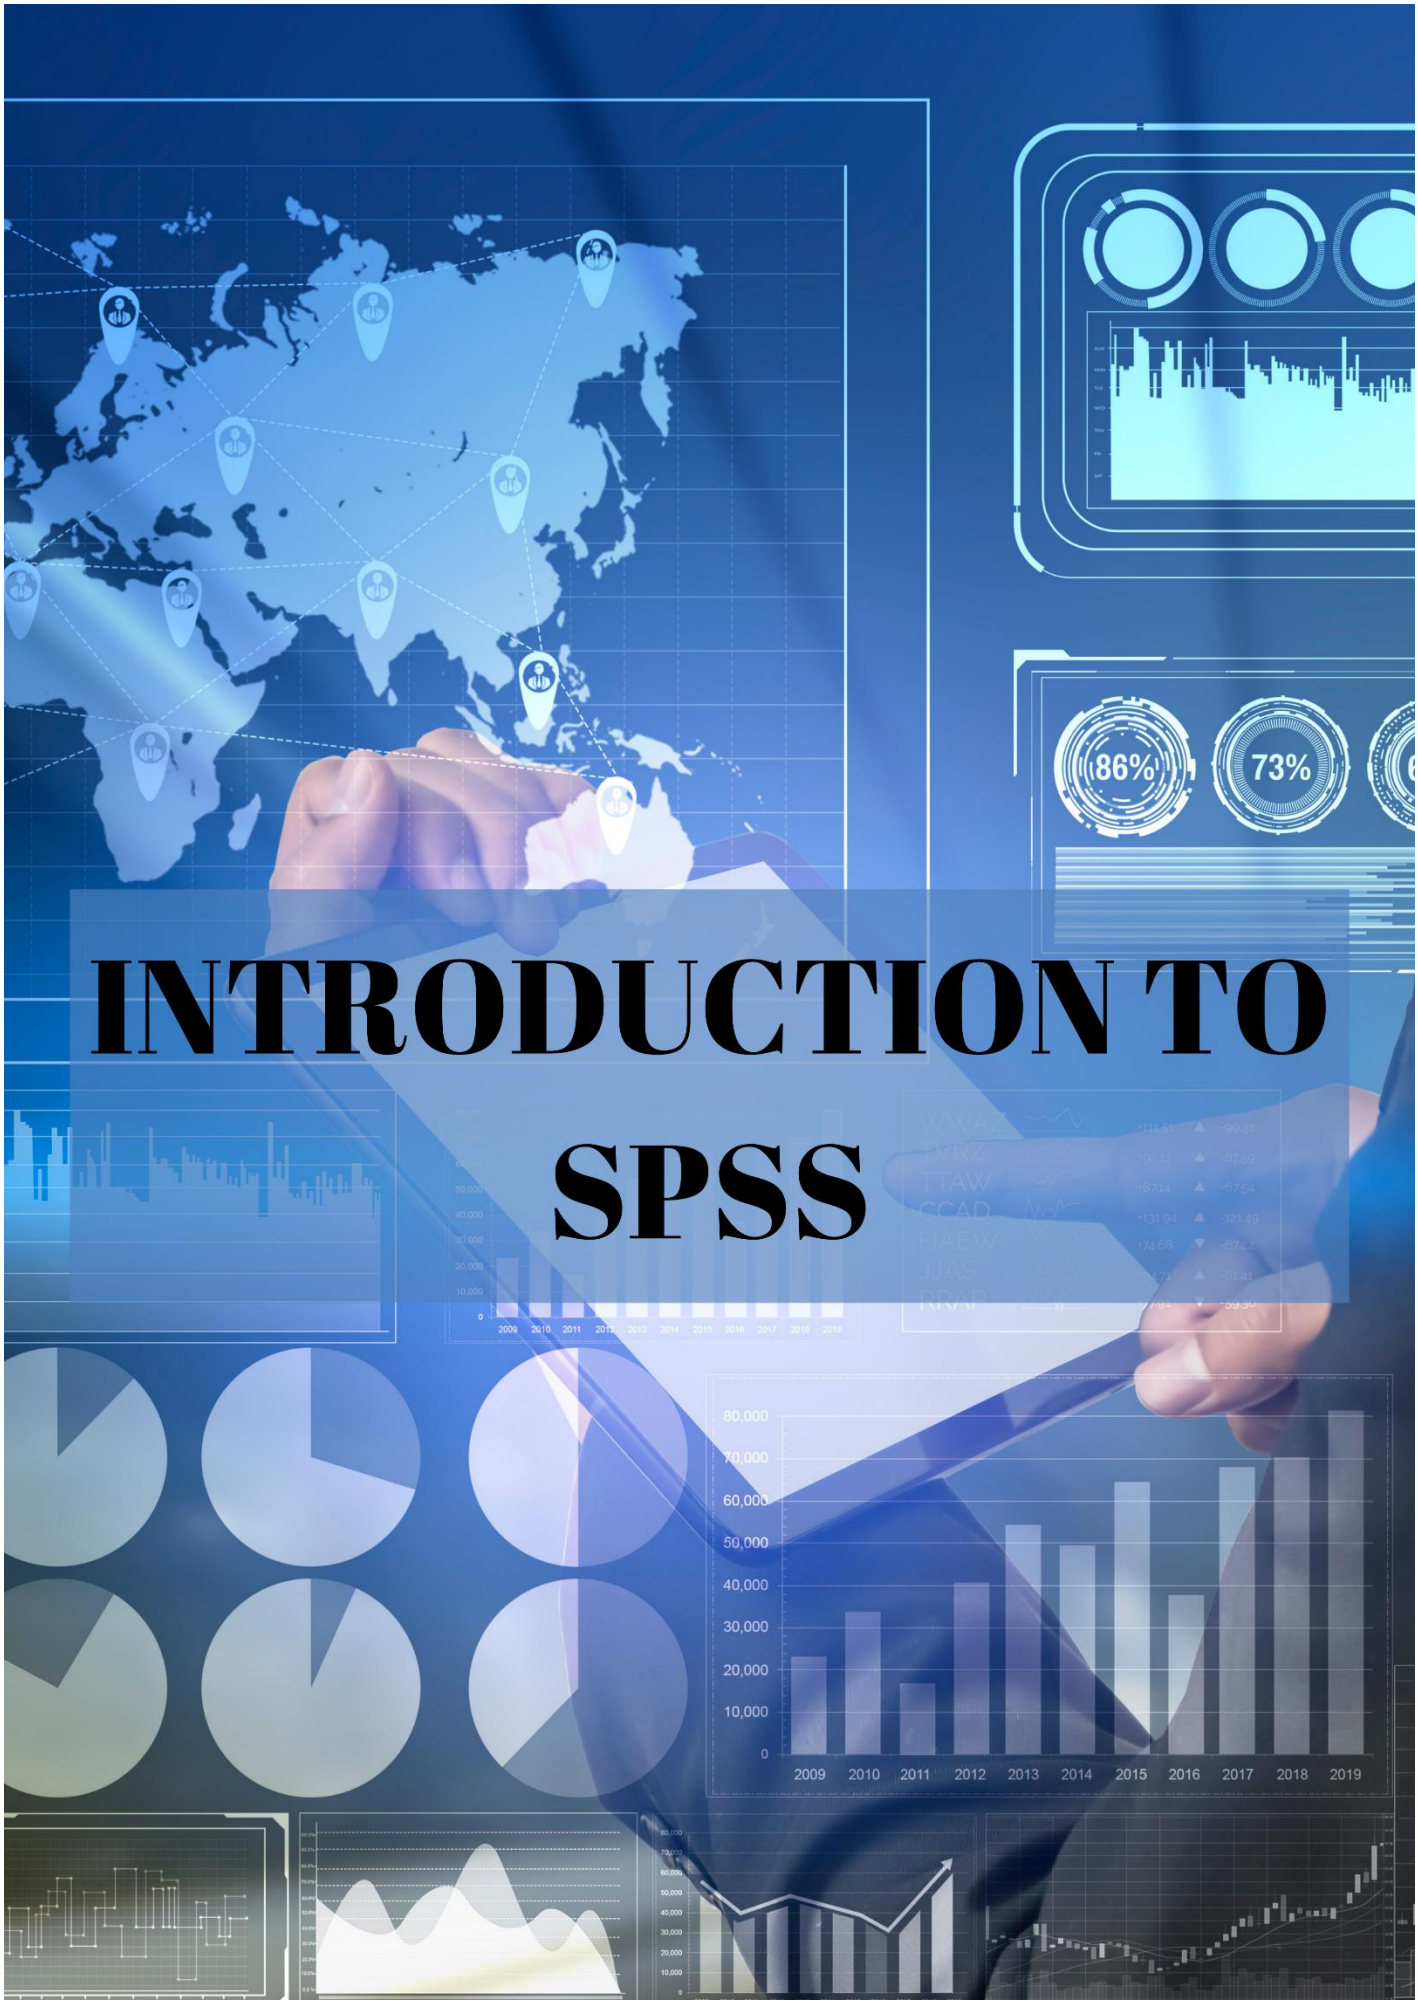

DETAILED MODULE

1 Introduction to GST in India
2. Supply under GST
3. Charges and Types of GST
4. Exemptions from GST
5. Time of supply and value of supply
6. Input Tax credit
7. GST Registration
8. Tax credit and Debit and E Way bill
9. Payment of Tax: methodology, Central and state transfer procedure
10. Filing of returns and provisions

ADD-ON COURSE ON "INTRODUCTION TO SPSS"

Course Description:

This course is designed to provide participants with a comprehensive introduction to IBM SPSS (Statistical Package for the Social Sciences). SPSS is a powerful software tool used for statistical analysis and data management. Through a combination of hands-on exercises and theoretical concepts, participants will learn how to navigate the SPSS interface, import and manipulate data, perform basic statistical analyses, and generate visualizations.

Course Objectives:

1. Familiarize participants with the SPSS interface and basic functionalities.
2. Teach participants how to import data into SPSS from various sources.
3. Enable participants to clean and prepare data for analysis.
4. Introduce participants to fundamental statistical concepts.
5. Instruct participants in conducting common statistical analyses using SPSS.
6. Guide participants in creating informative visualizations and charts.
7. Develop participants' ability to interpret and communicate results effectively.

Course Outline:

Session 1: Introduction to SPSS

- Overview of SPSS and its applications
- SPSS interface and workspace
- Data types and variable properties

Session 2: Data Import and Data Management

- Importing data into SPSS
- Data cleaning and data transformation

- Variable recoding and transformation

Session 3: Descriptive Statistics

- Measures of central tendency
- Measures of dispersion
- Frequency distributions and histograms

Session 4: Inferential Statistics (Part 1)

- Hypothesis testing fundamentals
- t-tests (independent and paired)
- Chi-square tests

Session 5: Inferential Statistics (Part 2)

- Analysis of variance (ANOVA)
- Correlation analysis
- Regression analysis (simple linear regression)

Session 6: Data Visualization in SPSS

- Creating various types of charts and graphs
- Customizing visualizations for clarity
- Exporting visualizations for reports

Session 7: Advanced Analysis Techniques

- Multiple regression analysis
- Logistic regression analysis
- Factor analysis

Session 8: Data Output and Interpretation

- Interpreting SPSS output
- Communicating results effectively
- Avoiding common pitfalls in data interpretation

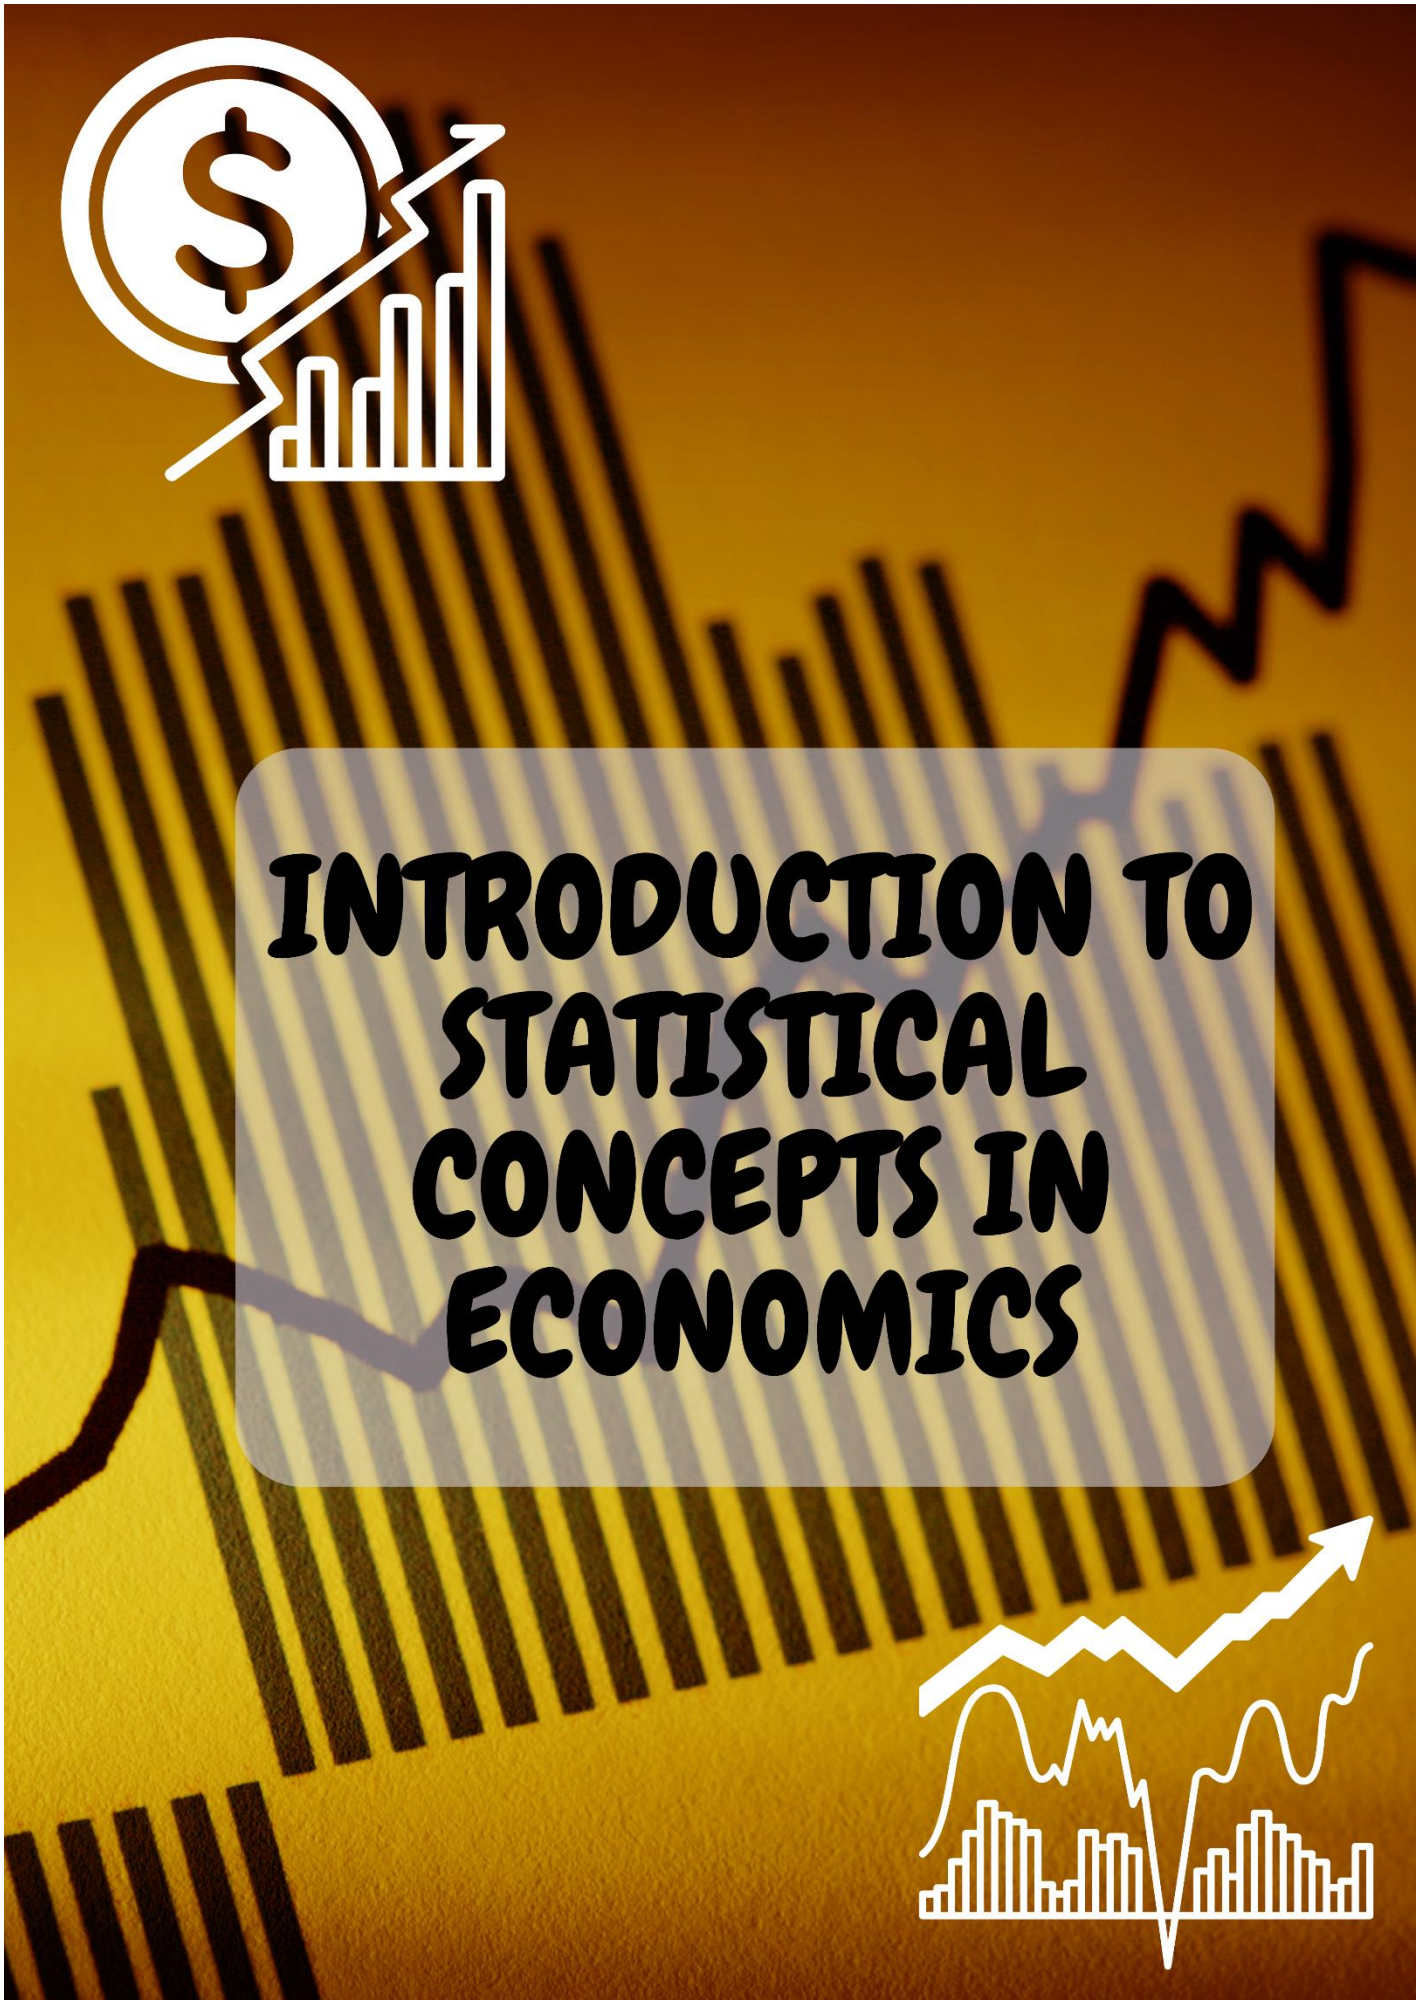

Session 9: Advanced SPSS Features

- Introduction to syntax in SPSS
- Automating tasks using syntax
- Data aggregation and restructuring

Session 10: Final Projects and Review

- Participants will work on real-world datasets to apply what they've learned
- Presentation and discussion of participants' projects
- Course review and Q&A

ADD-ON COURSE ON "INTRODUCTION TO STATISTICAL CONCEPTS IN ECONOMICS"

Course Duration: 30 hours

Course Duration: 30 hours

Course Description:

This course is designed to provide students with a foundational understanding of statistical concepts and their applications in the field of economics. Through a combination of lectures, practical exercises, and real-world examples, students will develop the skills necessary to analyze economic data, make informed decisions, and communicate their findings effectively.

Course Objectives:

By the end of this course, students should be able to:

1. Understand fundamental statistical concepts and their relevance to economics.
2. Apply statistical techniques to analyze economic data.
3. Interpret and communicate the results of statistical analysis.
4. Make informed economic decisions based on data-driven insights.

Course Outline:

Week 1: Introduction to Statistics in Economics (4 hours)

- Overview of the course and its importance in economics
- Basic concepts of statistics: population vs. sample, variables, data types
- Descriptive vs. inferential statistics

- Data collection methods in economics

Week 2: Data Presentation and Descriptive Statistics (6 hours)

- Data visualization techniques: graphs, charts, and tables
- Measures of central tendency: mean, median, mode
- Measures of dispersion: range, variance, standard deviation
- Skewness and kurtosis
- Interpreting economic data

Week 3: Probability and Probability Distributions (7 hours)

- Probability concepts in economics
- Probability distributions: discrete and continuous
- The normal distribution and its importance in economics
- Applications of probability in economics

Week 4: Sampling and Estimation (7 hours)

- Random sampling techniques
- Sampling distribution of the sample mean
- Confidence intervals for population parameters
- Estimation in economic research

Week 5: Hypothesis Testing (5 hours)

- Null and alternative hypotheses
- Types of errors in hypothesis testing
- t-tests and chi-square tests in economics
- Practical applications of hypothesis testing in economics

College-Pune
आदर्श महाविद्यालय-पुणे

- Data collection methods in economics

ADD-ON COURSE ON "INTRODUCTION TO GOOGLE WORKSPACE"

Course Duration: 30 hours

Course Description:

This course provides an in-depth introduction to Google Workspace, a suite of productivity and collaboration tools designed for individuals and businesses. Participants will learn how to effectively use Google Workspace applications for communication, document creation, data storage, and collaboration.

Course Outline:

Module 1: Introduction to Google Workspace (2 hours)

- Understanding Google Workspace and its applications
- Creating a Google Workspace account
- Navigating the Google Workspace interface

Module 2: Gmail and Google Calendar (4 hours)

- Setting up and managing Gmail
- Using labels and filters
- Scheduling events and meetings with Google Calendar
- Integrating Gmail and Calendar for productivity

Module 3: Google Drive and Google Docs (6 hours)

- Organizing files and folders in Google Drive
- Creating, editing, and formatting documents in Google Docs
- Collaborative editing and sharing
- Version control and revision history

Module 4: Google Sheets and Google Forms (6 hours)

- Creating and managing spreadsheets in Google Sheets
- Data analysis and visualization
- Building forms and surveys with Google Forms
- Collecting and analyzing form responses

Module 5: Google Slides and Google Drawings (4 hours)
