Activity Report

Academic Year: 2019-20

Report on Certificate Course: Principles of Programming and Algorithms.

Course Objectives: To provide the asymptotic performance of algorithms. Write rigorous correctness proofs for algorithms.

Course Outcome: Students will able to explain the major graph algorithms and their analyses. Employ graphs to model engineering problems, when appropriate

During the academic year 2019-20, our institution successfully conducted the add-on course titled " Principles of Programming and Algorithms" for FYBBA(CA) students. The course Principles of Programming and Algorithms aimed to empower students with essential digital skills and proficiency in using tools for both academic and professional purposes.

Eighty-five students actively participated in the course, which spanned over five weeks, with a total of 30 hours of instruction. The course was designed to provide hands-on experience and practical knowledge of course Principles of Programming and Algorithms.

The course evaluation indicated a high level of satisfaction among students, with an average rating of 4.3 out of 5 for overall course content and delivery. Feedback from the students highlighted the course's relevance, interactive nature, and its ability to enhance their digital competence.

In conclusion, the "Principles of Programming and Algorithms " course for FYBBA(CA) students during the academic year 2019-20 was a resounding success. It equipped students with vital digital skills, boosted their proficiency in Principles of Programming and Algorithms tools, and prepared them for future academic and professional endeavours. The institution looks forward to continuing to offer such courses to empower students in the digital age.
