## Activity Report

Academic Year: 2022-23

### Report on Certificate: Cloud Computing

**Course Objectives:** To provide various cloud service models, including Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS).

**Course Outcome:** Students will be able to develop a strong foundation in cloud computing concepts, terminology, and principles. Gain familiarity with major cloud service providers and their core offerings.

During the academic year 2022-23, our institution successfully conducted the add-on course titled "Cloud Computing" for TYBSC(CS) students. The course aimed to empower students with essential digital skills and proficiency in using require tools for both academic and professional purposes.

Sixty-six students actively participated in the course, which spanned over five weeks, with a total of 30 hours of instruction. The course was designed to provide hands-on experience and practical knowledge of Cloud Computing.

The course evaluation indicated a high level of satisfaction among students, with an average rating of 4.0 out of 5 for overall course content and delivery. Feedback from the students highlighted the course's relevance, interactive nature, and its ability to enhance their digital competence.

In conclusion, the " Cloud Computing " course for TYBSC(CS) students during the academic year 2022-23 was a resounding success. It equipped students with vital digital skills, boosted their proficiency in Cloud Computing tools, and prepared them for future academic and professional endeavours. The institution looks forward to continuing to offer such courses to empower students in the digital age.
