Activity Report

About the Activity

Guest lecture on "Business Plan" was successfully conducted by Ms. Nadya Narsi Dani on 24th August 2019. It was organized specifically for the final year students of BBA. It was a 2hour session which took place from 9:30am to 11:30am in the Smart Room. Ms. Narsi Dani initiated the program by questioning the students what did they mean by a Business Plan. After receiving a handful of good responses, she went on explaining and stating the importance of the preparation of a good business plan and how it is essential for every budding entrepreneur. She then briefed the students about its objectives being

1] To comprehend Business Nature

2] To Identify Objectives

3] To understand Organizational Structure

4] Evaluate Performance

5] To Obtain Finance. She then spoke about the 14 elements of a Business Plan with relative examples and summed up the session by proving how a business plan process is directly related to the organizational considerations, style of management, maturity of the organization, etc. Ms. Narsi Dani then came up with a question-answer round and a surprise quiz towards the end in which most of the students participated and performed well. Over all it was a lively session because of the interactive mode of teaching. The students took notes and found it to be very informative and interesting. Thus, making the session a grand success.

Activity Report

REPORT FOR WEBINAR ON RESEARCH ETHICS AND PLAGIARISM
DEPARTMENT OF SCIENCE
10th DECEMBER 2019
Attended by: TY BSc (CS) students.
Organized by: Christ College, Pune

About the Activity:

General Report:

Research is a process to discover new knowledge.

The objective of research is to "extend human knowledge of the physical, biological, or social world beyond what is already known." Research is different than other forms of discovering knowledge (like reading a book) because it uses a systematic process called the Scientific Method.

No matter what topic is being studied, the value of the research depends on how well it is designed and done. Therefore, one of the most important considerations in doing good research is to follow the design or plan that is developed by an experienced researcher who is called the Principal Investigator.

Aims & Objectives:

1. Explain the concept of research ethics and its significance in academic and professional research.

2. Analyse how these challenges affect the quality, timeliness, and effectiveness of research paper production.

3. Offer practical solutions, strategies, and best practices to overcome the identified challenges.

Learning Outcome:

1. Students Came to about the various challenges that are faced in research paper writing.

2. Students came to know about how to tackle those challenges and overcome it.

No. of Students Benefitted : 20

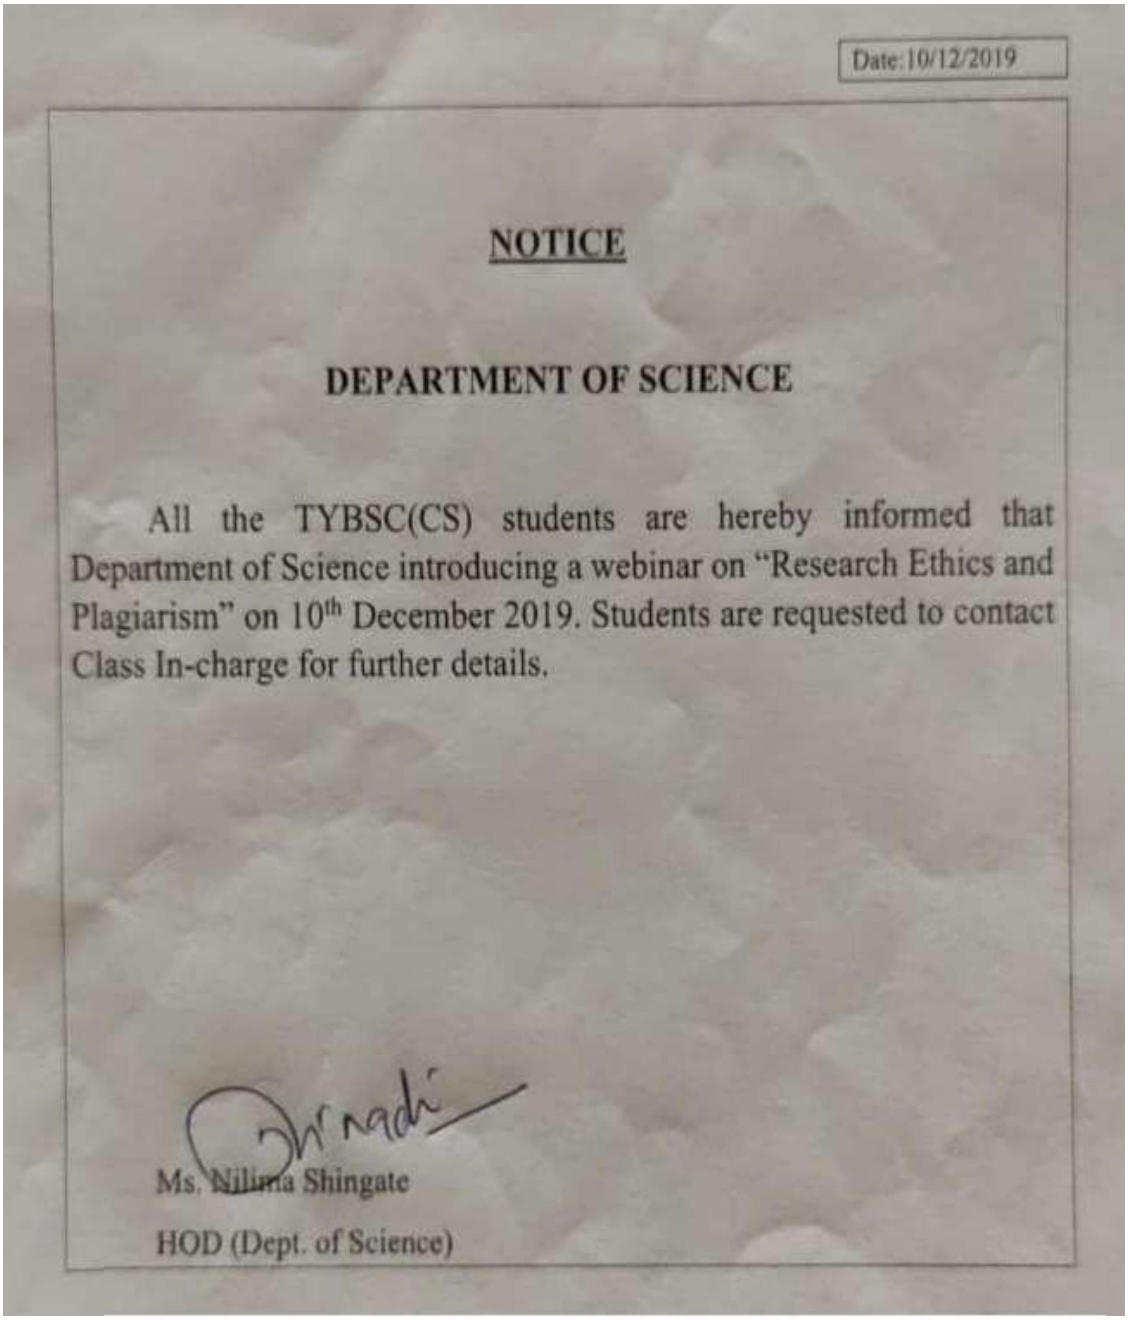

About the Resource Person

Naived George Eapen, being a Post Graduate in Computer Science and a Google Certified Educator, has an experience of working with AI and ML based live projects and has interned in two different companies as a Full Stack Web Developer and AI Engineer. His area of interests are towards IoT, Computer Vision, Machine Learning, API Development and Programming Fundamentals. He is passionate to work with programming and scripting languages such as C, JAVA, Python, Android, Javascript, C#, Matlab etc.

Activity Report

About the Activity

Students of Christ college Pune recently received a guest lecture from L&T Senior Manager, Sanjeev Joshi on Supply Chain Management: Ensuring Efficient and Sustainable Operations

Mr. Sanjeev has a wide experience with L&T and has handled various roles such as Monitoring projects from conceptualisation & visualisation to technology mapping and final execution, Coordinating business analysis sessions for understanding client business processes; providing business consultancy services for developing organizational processes, framework and methodology for clients, Extending consultancy for implementation of ERP & SCM projects, handling client interaction for requirement gathering, mapping business requirements (as-is and to-be analysis) for all modules, Preparing scope of implementation and conducting GAP analysis. and Resource Planning

The theme of the day was 'preparing for the future', looking at the links between future career development, information technology and sustainability. Students heard how L&T is helping businesses move towards circular economy business models and the challenges that they face.

Mr.Joshi emphasised the need to stay up-to-date with technology, especially software skills, and that we are seeing 'digital disruption' across many sectors. How this disruption will impact business and society is a major source of debate at present.

Mr. Sanjeev said that

"Technology will definitely enable new sustainable business models and products/services. However, business must acknowledge the risks of unintended consequences, such as job displacement and environmental impact. Mitigation plans should be put in place with the implementation strategy and The most important thing to get across is to start thinking now about how the world might be ten years from now. This means learning how to be agile and adaptable, being aware of environmental and social challenges, and the rapid impact of new technology, especially in ICT."

It was a very informative and interactive session. Students participated with a lot of questions about the future in logistics and were met with satisfactory answers.
