About the Activity

General Report:

About Sagitec

Sagitec is a private company found and working since 2004, sagitec has been driving vision into action for their clients. With deep roots in the industry, the senior partners formed sagitec to provide superior solution by superior means.

Sagitec works on building benefit management system tailor-fit to the size, budget, and need of our partner organizations.

At sagitec, they believe their success in the industry is the direct result of continued investment in our framework technology and a sustained commitment to the core values and best practices they started with.

The main purpose of the company is:

"To deliver dynamic IT solutions to our partner organizations, to work with you in understanding your unique vision, to drive that vision into action."

About their xelence program

Xelence™ is Sagitec's low-code/no-code Platform. It is a visual software development environment that allows citizen developers and IT professionals to quickly design, test, and deploy powerful software applications. Drag and drop visual components, create dynamic user experiences, build end-to-end process flows, and formulate complex business rules with simplicity. Xelence helps large enterprises build complex custom software faster, with higher quality, and lower costs than traditional approaches, with significantly reduced lines of code.

Core idea of xelence-

<u>We Put Speed, Simplicity, and Evolution at Your Fingertips</u>

- Simplify and accelerate enterprise application development.
- Scale enterprise applications as needed.
- Future proof and evolve your enterprise applications.

Aims & Objectives:

1. To provide internship and job opportunities to final year student.

Learning Outcome:

1. The company would provide basic training to the interested students on programming language, app development and the management of these applications.
2. After the completion of training period they would be given a final project to work on and will be evaluated on the basis of this project for internship in the company.
3. The internship process will vary from person to person and the interns will then be evaluated by the company for further job roles depending on performance.

No. of Students benefitted:

- Third yea students of Bachelors of Sciences in Computer Science
- Third year students of Bachelors in Business Administration and Computer Application
- Masters in science
